

## Chapter 7 Butterfly II

Why did you pick a fight with the big brothers from Upper Kindergarten? And you injured them both!

They had mocked about radio gymnastics and called me idiot...

You can just practise for yourself, why bother with other people's opinion?

But, Dr Shunlu...

Are there really secret  
martial arts masters in the  
radio gymnasiums? All my  
classmates mock me!

And I heard these masters  
will drain your life force...

Can I really  
succeed?

Dead Ex-  
cubaner

Are you afraid  
of failure...

or are you afraid of  
other people's mocking?

Let me tell you  
a story...

A story about human's dream...

Long long ago in the USA...  
a time when electricity is  
still new even for the cities.

Our hero is named Gaddard, who had  
special interests and skills about science  
fiction and machinery since childhood  
thanks to his father's specialisation...

He was weak and often ill, so he could not go to school normally.

He was fascinated by sci-fi works like *The War of the Worlds*, *The First Men in the Moon*, *From the Earth to the Moon*.

Since then, he made his life target clear:  
He wants to invent something, which can fly  
higher and farther than anything else.
